Summary of offer	<i>Miniaturized Electromagnetic Device - Advanced Healing Abutments with Pulsed Electromagnetic Field Technology</i>
<p><u>Description of Offer</u></p> <p>Our company introduces a groundbreaking approach to dentistry by utilizing Pulsed Electromagnetic Field (PEMF) technology, adapted from orthopedics and FDA-approved for dental applications.</p> <p>This innovation, applied through our healing abutments, offers significant benefits:</p> <ul style="list-style-type: none"> *Faster Recovery: Speeds up bone formation and reduces inflammation, reducing recovery time by threefold. *Enhanced Patient Care: Provides critical benefits to high-risk chronic patients while effectively addressing peri-implantitis, a leading complication in implantology. *Cost Efficiency: Saves insurance companies on patient care costs and offers implant manufacturers a cost-effective solution to integrate proven technology, bypassing extensive R&D. <p>Our product is fully commercialized, backed by CE Clearance for Europe, expanding globally while seeking FDA approval for broader market adoption. By enhancing patient outcomes and clinic efficiency, our technology represents a transformative leap in dental care and a lucrative opportunity for practitioners and implant companies.</p>	
Potential Partners	Local distributors of dental products, dental implant companies, Dental Supply Organizations (DSOs), and dental clinic chains
Target Countries	France, Spain, Italy, Germany

<i>Offer No.</i>	<i>155082</i>
<i>Interested in</i>	<i>Export</i>
Summary of offer	<i>Innovative, easy-to-install LiDAR Solutions and Advanced Applications</i>
<p><u>Description of Offer</u></p> <p>Founded in 2016, Our company has developed the world’s most advanced pure solid- state scanning LiDAR solution. Headquartered in Israel, the company also has offices in the USA, APAC, and Europe.</p> <p>Our proprietary technology includes a range of products featuring its unique, non-moving parts scanning LiDAR solution. Our LiDAR is a 4D sensor capable of operating day and night, in difficult weather conditions or against direct sunlight, with minimal performance degradation. The technology allows point-by-point scanning, which increases the ‘signal- to-noise ratio’ and ‘single-point probability of detection’.</p> <p>With no moving parts, our sensors deliver 24/7 operation while keeping costs low. Due to its solid-state nature, the sensor ensures long-term reliability, making all processes 100% dependable.</p> <p>The ALTOS platform (Advanced LiDAR Technology Sensors) supports a wide range of industrial applications to improve workforce safety, enhance efficiency, and reduce costs. For example, legacy systems in Smart Cities and Intelligent Traffic Systems (ITS) can be seamlessly replaced or global supply chains in agriculture can be advanced.</p> <p>The Altos platform includes perception capabilities on board to monitor and report any event that is analyzed by the perceptions system.</p>	
Potential Partners	ITS, Smart Cities, and Security system providers
Target Countries	US, EU/UK, Canada, and Asia

Summary of offer	We are a technology company specializing in the development of wireless solutions for remote tracking, monitoring, and protection of various income-generating assets
<p><u>Description of Offer</u></p> <p>Founded in 2004, our company specializes in developing wireless solutions for remote tracking, monitoring, and protection of various types of income-generating assets.</p> <p>Today, our global operation includes over one million transmitting devices in 55 countries, more than 100 distributors, and over 50 international logistics support partners.</p> <p>We offer a successful, active, advanced, and stable technology platform, supported by a real-time management system that processes 3.6 billion messages every month. These messages are sent from various fleets and income-generating assets under monitoring across the globe.</p> <p>Our company also provides smart solutions to maximize security in sensitive locations where there is a need to enhance the protection of content, cargo, sensitive areas, and asset usage/restrictions. These solutions include monitoring sensitive contents, locations, and usage permissions, as well as tracking entrances and exits with frequencies that can be monitored and controlled via permissions only.</p> <p>Our solutions can be applied in different areas, including:</p> <ul style="list-style-type: none"> * Fleet management * Monitoring and management of income-generating assets * Cargo and goods (both mobile and stationary) * Storage locations with theft potential * Security applications, such as in weapon and ammunition storage * High-security classified material storage areas * Defence industry facilities involved in projects for the defense system * Sensitive civilian facilities, and more 	

Potential Partners	Distributors and resellers, logistics and supply chain companies, technology integrators, and more
Target Countries	Worldwide
Other Information	<p>We would be happy to host you and present our applications and uses, expand and tailor solutions in collaboration with various customer representatives.</p> <p>For interested parties, we will send the technical specifications for the various endpoint devices developed and manufactured by our company.</p>

Summary of offer	<i>BusinessGPT Private AI - Private AI knowledge chatbot, data analysis, and semantic search</i> <i>BusinessGPT AI Firewall - Visibility and control over Generative AI usage</i>
<p><u>Description of Offer</u></p> <p>Our company has been offering security and governance solutions for a decade. Our BusinessGPT provides risk management and data protection for Generative AI, including two modules:</p> <ol style="list-style-type: none"> 1. AI Firewall: Real-time control of AI services such as ChatGPT/Copilot/Gemini by applying risk-based policies and classifying data sensitivity. 2. Private/On-prem AI: An end-to-end AI chatbot solution that delivers answers, data analytics, and direct search from your primary data sources while ensuring zero data exposure. 	

AI Firewall Description:

BusinessGPT firewall allows companies to enforce AI policies by analyzing and understanding the use case and the user's objectives for using AI.

The firewall safeguards against AI misuse that could pose a risk or violate company policies by understanding the users' objectives, the relevant content, and the sensitivity or privacy level of their activities.

Policies can be applied differently depending on the users or groups, enabling companies to maximize AI's benefits while minimizing potential risks.

Using a proxy or API, BusinessGPT provides companies with complete visibility and analytics of users' AI interactions, whether with ChatGPT, Copilot, Gemini, or a custom AI model.

Private AI main modules:

With the ability to connect to a variety of data sources, such as documents, websites, and databases, BusinessGPT's Private AI offers the following main capabilities:

- Knowledge base (RAG) chatbot:

Generate answers from all company-connected sources and pre-trained knowledge

- Data analysis:

Perform complex data analysis on Excel, databases and files, generating reports and charts.

- Semantic search:

Search all your content with an advanced understanding of intent, context, synonyms, and concepts, going beyond simple keyword matching.

Potential Partners	System Integrators operating in finance, government, defense, healthcare, and legal industries, with annual revenue of \$100M+ and up to 2,000 employees. Also open to smaller integrators in the same fields.
Target Countries	United States, Canada, UK, Western Europe
Other Information	We sell both through partners and directly and are looking to expand our partner network. We currently have strong partnerships with EMET and Malam Team in Israel and aim to replicate these successes. We are also looking for introductions to key customer accounts.
